

To allow more complex macros, enabling the access to "**VBA project object model**" is a must
This just allows the macros to connect to VBA project libraries which has additional functions
Go to **File**, at the top left of the workbook

Go to **Options**, at the bottom left

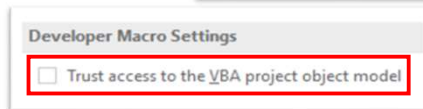

Go to **Trust Center** at the bottom of the left menu

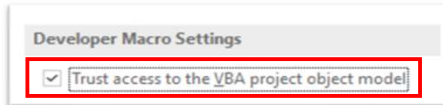

Under **Microsoft Excel Trust Center**, go to Trust Center Settings...

Go to **Macro Settings** at the middle of the left menu

Under **Developer Macro Settings**, you'll see the "**Trust access to the VBA project object model**" option

Make sure that the box is **CHECKED** to enable it.
